

## Event Overviews

The [Data Visualization Masterclass](#) is a highly regarded professional training series, held at global locations over the past ten years as a satellite event to the international meetings on Visualizing Biological Data (VIZBI), and supported by the International Society for Computational Biology (ISCB). The Masterclass features renowned experts who distill decades of experience into a compact format. Participants gain essential skills to uncover insights from complex data, validate AI-driven findings, and effectively communicate their results.

## Key Benefits for Attendees

- **Master Best Practices:** Gain hands-on knowledge of advanced data visualization principles, strategies, and tools directly applicable to your work.
- **Expert Guidance:** Learn from a world-renowned expert with decades of experience in visualizing complex data.
- **Professional Growth:** Enhance your ability to validate datasets, interpret AI-driven insights, and craft compelling data-driven narratives.
- **Interactive Learning:** Present your challenges in lightning talks to receive tailored feedback from the instructor and peers.
- **Certification:** Receive a completion certificate to support your professional development goals.

## Practical Applications

- Design clear, impactful visualizations for complex datasets.
- Communicate findings effectively to diverse audiences.
- Navigate challenges like multimodal data integration and data storytelling.
- Optimize visual designs for accessibility and engagement.

## Pricing and Registration

- **Cost:** industry: €300, academics/freelancer: €225, student/unemployed: €150
- **Location:** Karlstorkino, Medienforum Heidelberg, Germany.
- **Date and Time:** Wednesday, 2 April 2025 | 1:00 PM – 4:00 PM.
- **Registration:** Reserve your spot using the link below.
